

Toyota Forklift Parts

Toyota Forklift Part - Since 1992, Toyota Material Handling inc., U.S.A., also known as TMHU, has been the best selling lift truck dealer in the U.S. Proudly celebrating more than 40 years of operations, the Irvine, California based business presents an extensive line of quality lift vehicles. Due to their reputation of superiority, reliability, and resilience, Toyota remains prevalent in this competitive market. Quality is the foundation of Toyota's legendary Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, situated in Columbus, Indiana. The majority of the Toyota lift trucks sold in the U.S. are manufactured here.

All Toyota equipment and components designed within North America adhere to the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its dedication to persistent development, and its environmental methods. It is the first and only producer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For instance, the Toyota 8-Series IC lift trucks emit 70 percent less smog forming emissions than the existing federal EPA standards and have complied with California's strict emission standards and regulations.

Toyota Material Handling, U.S.A. - The Industry Leader

The president of Toyota Material Handling, U.S.A., Brett Wood believes that TMHU's achievement comes from its commitment to manufacture high quality lift trucks while offering exceptional client assistance and service. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, often known as TICO, is listed in Fortune Magazine as the world's biggest lift truck dealer and is amongst the magazines prominent World's Most Admired Companies.

Redefining Environmental Responsibility

Toyota Industries Corporation, as the parent company, has instilled a rich corporate doctrine of environmental stewardship in Toyota. Not many other companies and no other lift truck manufacturer can match Toyota's record of caring for the environment while simultaneously encouraging the economy. Environmental accountability is an important feature of company decision making at Toyota and they are proud to be the first and only manufacturer to offer UL-listed, EPA - and CARB -certified Compressed Natural Gas powered lift vehicles. Yet another reason they remain a leader within the industry.

Toyota originally introduced the 8-Series line of lift trucks in 2006, again exhibiting its leadership and innovation in the industry. Featuring an exclusive emission system that eclipsed both Federal EPA emission standards, and California's more environmentally friendly emission standards. The finished invention is a lift vehicle that creates 70% less smog forming emissions than the current Federal standards tolerate.

Moreover in 2006, Toyota established an affiliation with the Arbor Day Foundation, furthering their commitment to the environment. Upwards of 57,000 trees have been planted in district parks and national forests damaged by ecological causes such as fires, as a result of this partnership. 10,500 seedlings have also been distributed through Toyota Industrial Equipment's network of sellers to non-profit organizations and neighborhood customers to help sustain communities all over the United States

Toyota's lift vehicles offer enhanced productivity, visibility, ergonomics and resilience, and most significantly, the industry's leading safety technology. The company's System of Active Stability, often known as "SAS", helps reduce the chance of incidents and accidental injuries, in addition to increasing productivity levels while minimizing the potential for product and equipment damage.

System Active Stability senses several conditions that could lead to lateral insecurity and potential lateral overturn. When any of those factors are detected, SAS instantaneously engages the Swing Lock Cylinder to stabilize the rear axle. This transitions the lift truck's stability footprint from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the probability of an accident from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to prevent injuries or accidents while adding strength.

SAS was initially released to the market on the 7-Series internal combustion models in 1999 and subsequently catapulted Toyota into the industry leader for safety. Since then, SAS have been integrated into nearly all of Toyota's internal combustion products. It is standard equipment on the latest 8-Series. There are more than 100,000 SAS-equipped lift vehicles in action, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with mandatory worker education, overturn fatalities across all models have decreased by 13.6% since 1999. Furthermore, there has been an overall 35.5% drop in industry wide collisions, loss of control, falls and overturn from a lift vehicle for the same period.

Toyota's measure of excellence reaches far beyond its technological achievements. The company maintains an extensive Operator Safety Training curriculum to help consumers meet OSHA standard 1910.178. Training services, videos and a variety of materials, covering a wide scope of matters-from personal safety, to OSHA policies, to surface and load situations, are available through the vendor network.

Toyota has maintained a permanent presence in the United States ever since its first sale. In 2009, Toyota Industrial Equipment Manufacturing, produced its 350,000th lift truck. This fact is demonstrated by the statistic that 99% of Toyota lift trucks bought in America now are built in the United States.

Based in Columbus, Ind., the Toyota Industrial Equipment Mfg. campus equals 998,000 square feet of facilities across 126 acres. Facilities include a National Customer Center, as well as manufacturing operations and distribution centers for equipment and

service parts, with the total commitment exceeding \$113 million dollars.

The new National Customer Center was conceived to serve both sellers and buyers of TMHU. The facility includes a 360-degree showroom, a presentation theater complete with stadium seating for 32, an area for live merchandise demonstrations with seating capacity for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's story since the birth of its creator, Sakichi Toyoda, in 1867, and lastly a instruction center.

The NCC embodies Toyota's dedication to offering top-notch client service. TMHU's 68 certified Toyota Industrial Equipment, or TIE dealers, along with 189 dealership locations throughout the U.S, present the most comprehensive and inclusive client service and support in the industry. The company's new and Certified Used lift trucks, service, components, and financing features make Toyota dealerships a one-stop shop to ensure overall consumer satisfaction.
